"Nucleotide and derived amino acid sequence of the subtilisin from
The anteractic psychrotroph Bacillus TA39.";

Elochim. Blophys. Acta 1131:111-113(1992).

Elochim. Blophys. Acta 1131:111-113(1992).

I catalyzes the hydrolysis of proteins and peptide amides.

I catalyzes the hydrolysis of proteins with broad specificity

C -!- CATALYTIC ACTIVITY: Hydrolysis of proteins with broad specificity

C -!- CATALYTIC ACTIVITY: Hydrolysis of proteins with broad specificity

C -!- CATALYTIC ACTIVITY: Hydrolysis of proteins with broad specificity

C -!- COFACTOR: Binds 1 calcium ion per subunit (Potential).

C -!- SUBCELLUANEOUS: Sereted

C -!- SUBCELLUANEOUS: Sereted

C -!- ALSCELLANEOUS: Secretion of subtilisy is associated with onset of sporulation, and many mutations which block sporulation at early stages affect expression levels of subtilishin However, subtilishin is not necessary for normal sporulation.
                                                                                                                                                                                                                                                                                                                                          This SWISS-PROT entry is copyright. FUNCTION: NOT YET KNOWN; COULD BE INVOLVED IN PROTEOGLYCAN DEGRADATION, BY CLEAVAGE OF ITS PEPTIDE BRIDGES.
-i. SUBCELLULAR LOCATION: Cell-wall bound.
-i. PTM: PROCESSED INTO CWBP23 AND CWBP52.
-i. SIMILARITY: Belongs to peptidase family S8.
                                                                                                                    Medina N., Vannier F., Roche B., Autret S., Levine A., "Sequencing of regions downstream of addA (98 degrees) degrees) in Bacillus subtilis."; Microbiology 143:3305-3308(1997).

C. - CATALYTIC ACTIVITY: Hydrolysis of proteins and peptide amides.

It catalyzes the hydrolysis of proteins with broad specificity of peptide bonds, and a preference for a large uncharged residue.

C. CATALYTIC ACTIVITY: Hydrolysis of proteins with broad specificity in Pl. Hydrolyses peptide amides.

C. - CATALYTIC ACTIVITY: Bydrolysis of proteins with broad specificity of the preference for a large uncharged residue.

C. - CATALYTIC ACTIVITY: Bydrolysis of proteins with near second in Pl. Hydrolyses peptide amides.

C. - CATALYTIC ACTIVITY: Bydrolysis of proteins with near second in Pl. Hydrolyses peptide amides.

C. - CATALYTIC ACTIVITY: Becreted.

C. - CATALYTIC ACTIVITY: Becreted.

C. - CATALYTHOLOGY: Secreted.

C. - SUBCELLIGAR LOCATION: Secreted.

C. - SUBCELLIGAR LOCATION: Secreted.

C. - SUBCELLIGAR LOCATION: Secreted.

C. - SUBCELLIGAR LOCATION: Secreted.

C. - Supportation, and many mutations which block sportulation at early stages affect expression levels of subtilisin. However, subtilisin contains and the secreted.

C. - SIMILARITY: Belongs to peptidase family S8.

Dai E.F.;

Total based protease inhibitors: crystal structures of gamma-
and subtilisin Callsberg complexes.";

Biochemistry 37-451-462(1998).

L. FUNCTION: Subtilisin is an extracellular alkaline serine protease,
it catalyzes the hydrolysis of proteins and peptide amides.

L. FUNCTION: Subtilisin is an extracellular alkaline serine protease,
it catalyzes the hydrolysis of proteins with broad specificity

C. CATALYTIC ACTIVITY: Hydrolysis of proteins with broad specificity

C. CATALYTOR Spride bonds, and a preference for a large uncharged residue
in Pl. Hydrolyzes peptide amides.

C. SUBCELLULAR LOCATION: Secreted.

C. SUBCELLULAR LOCATION: Secreted.

Alcalase by Novozymes

C. MISCELLANEOUS: Secretion of subtilisin is associated with onset of
sportlation, and many mutations which block sportlation at early
is not access of the process of subtilisin is associated with onset of
stages affect expression levels of subtilisin. However, subtilisin
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      This SWISS-PROT entry is copyright. BLOSUM62 Gapop 10.0 , Gapext 0.5 Scoring table:

283366 seqs, 96191526 residues Searched:

283366 Total number of hits satisfying chosen parameters:

Minimum DB seq length: 0 Maximum DB seq length: 200000000

Post-processing: Minimum Match 0% Maximum Match 100% Listing first 45 summaries

Database :

PIR 78:* 1: pirl:* 2: pir2:* 3: pir3:* 4: pir4:*

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

--- FUNCTION: Intercellular communication via tagB may mediate integration of cellular differentiation with morphogenesis.
--- SIMILARITY: In the N-terminal section; belongs to peptidase family
                                                                                                        S8.
--- SIMILARITY: IN THE C-TERMINAL SECTION; BELONGS TO THE ATP-BINDING TRANSPORT PROTEIN FAMILY (ABC TRANSPORTERS). MDR SUBFAMILY.
--- SIMILARITY: STRONG, TO TAGC.
                                                                  380 VGNDFTAPYDN------NWDGRNNVENVFINAPQSGTYTVEVQAYNVPVSPQTFS

C. I. CATALVITC ACTIVITY: Hydrolysis of proteins and peptide amides.

C. CATALVITC ACTIVITY: Hydrolysis of proteins with broad specificity
for peptide bonds, and a preference for a large uncharged residue
C. I. COPACTOR: Binds I calcium ion per subunit (Potential).

C. SUBCELLANEOUS: Scilla active at temperatures close to 0 degrees
C. I. MISCELLANEOUS: Scilla active at temperatures close to 0 degrees
C. MISCELLANEOUS: Scilla active at temperatures close to 0 degrees
C. MISCELLANEOUS: Scilla active at temperatures close to 0 degrees

C. Subculation, and many mutations which block sporulation at early stages affect expression levels of subtilisin. However, subtilisin is not necessary for normal sporulation.
C. SIMILARITY: Belongs to peptidase family S8.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            This SWISS-PROT entry is copyright.
